Description

MAG Magnesium Rub: (formally Essence of Life Magnesium Rub)

Delivers high levels of magnesium directly through the skin to the cellular level, bypassing common intestinal and kidney symptoms associated with oral magnesium supplementation. Our Magnesium Rub and Gel are derived from the ocean. In essence, you are getting natural ocean water in its most condensed form. The water has been so condensed that it feels silky and is non-oily and non-greasy.

Health Issues:

Research indicates that most people are lacking in magnesium and that many health issues are related to magnesium deficiency. Reduced levels of DHEA (the "youth hormone") are also directly related to magnesium deficiency. Magnesium Rub can deliver all of the magnesium you need to restore DHEA levels and to help you look and feel

younger.

Usage Advice:

Apply directly to appropriate area. Massage MAG365 Magnesium Oil into aching joints and muscles or into skin needing rejuvenation. A slight tingling may be experienced initially. If undue redness or stinging is experienced, dilute with water or apply to wet skin. Alternatively use 30-60ml in a tub or foot bath & soak for at least 20 minutes to relieve aches, pains and stress while you increase your magnesium levels.

Recommended Use:

As a magnesium supplement; providing magnesium by absorption through the skin. Can also be used to moisturize and refresh the skin, as a natural underarm deodorant, toner, or spa bath mineral.

Ingredients:

Concentrated seawater with the sodium removed; all natural sources.

Each ml contains 450mg magnesium chloride

10 drops is approximately 400mg

237ml 8oz
